The Justice Series

Biosocial criminology is an interdisciplinary field that aims to explain crime and antisocial behavior by exploring both biological factors and environmental factors. While contemporary criminology has been dominated by sociological theories, biosocial criminology also recognizes the potential contributions of fields such as genetics, neuropsychology, and evolutionary psychology. Critically discuss the contention that criminology is “the study of the causes of crime”. Nowadays, it is easy to find crime news in the newspaper. The number of crime increase year by year because of the complexity of society. Earn a Bachelor's in Criminal Justice - Major Crime Scene Investigation Procedure online. Apply Now!
