

Download Expert Oracle Database Architecture

Service-Oriented Architectures (SOA) and Oracle Business Process Management (BPM) One characteristic of an RDBMS is the independence of physical data storage from logical data structures. In Oracle Database, a database schema is a collection of logical data structures, or schema objects. A database user owns a database schema, which has the same name as the user name.. Schema objects are user-created structures that directly refer to the data in the database. Oracle Database training teaches you the skills you need to install, configure, design and troubleshoot database systems. Learn more about online and in-person courses and certifications available from Oracle University.
