

Download Ice Cream In A Bag Science Experiment

To make ice cream, the ingredients—typically milk (or half and half), sugar and vanilla extract—need to be cooled down. One way to do this is by using salt. If you live in a cold climate, you ...Did this experiment for years with my students. Also used it as a “follow the directions” lesson. The kids loved it! But, even when I cautioned them to be careful about following directions there was always at least one group who ended up with salty ice cream.What's a liquid? What's a solid? What better way to experiment, than by turning a kid favorite, ice cream, into a homemade science lesson!Why do you need salt to make ice cream? By Marshall Brain.
