Products on this page are arranged by title and include a brief description, publication date, and a link to the product. score - A Pocket Reference - Pocket P.E.P. Clinical management of non-occupational and occupational exposure to blood borne pathogens Form No. 72090 Dev. 06/2011 Rev. 03/2017 A drug interaction is an unintentional effect of using two (or more) drugs, or an interaction between a drug and food, beverage, or supplement. It is defined as the change in efficacy or toxicity of one drug by prior, or concomitant administration of a second drug (or other active substance).. There are several possible reasons for drug interactions. One of the drugs in the combination may ...
