

Download The Parents Guide To Successful Home Schooling

Home schooling neither isolates children nor harms their academic growth; it does, however, come close to the true definition of education: the passing down of culture. Studying at home provides a more conducive environment and parents have faith that they can give their children better schooling at home. Children can study in a cleaner and more comfortable place where they are already familiar with. This web page, which provides information about home schooling, was created by the Texas Education Agency as a courtesy to parents interested in educating their children at home. The TEA does not regulate, index, monitor, approve, register, or accredit the programs available to parents who choose to home school. Explore the New PBS Parents Child Development Tracker ? ...
